Practical – 6.1

AIM

To implement an Android application demonstrating **programming of menus and dialogs** for user interaction.

PROBLEM STATEMENT

Design and develop an Android application that uses an **Options Menu** with multiple menu items. On selecting a menu item, display an appropriate **dialog** to show information or to confirm user action, and perform the required operation based on the user's response.

```
app
 ├── java
 |   └── com.example.menudialogapp
 |       └── MainActivity.java
 ├── res
 |   ├── layout
 |   |   └── activity_main.xml
 |   ├── menu
 |   |   └── menu_main.xml
 |   └── values
 |       └── strings.xml
```
